To whom it may concern,

It is in confidence and satisfaction that I recommend Greg Bartholomew of Barcon Industries to tender on your projects.

During 2008 Barcon Industries has completed major renovation and construction external and internal works to the modular portables at Emerson School. The works included were:

- Commercial kitchen for food and hospitality studies
- Fit-out for manufacturing and retail studies
- Fit-out of partitions workstations and administration areas
- External ramps, pergolas, stairs, concreting, fencing
- Construction of atrium linking the two portables featuring curved roof profile.

The completed projects have been both extremely functional and aesthetically pleasing, promoting positive comments from principals, staff, school council members, parents and visitors to the school.

As well as being most cost effective, the total renovation works were completed over a short period, as promised, so there was no disruption to school procedures. The staff members were able to commence work immediately, the day after the finishing dates as agreed, a most important consideration when contemplating choosing contractors. Equally important was that Greg assumed total control of the project, allowing me a stress free project from start to finish.

For efficiency, reliability, excellent workmanship, competitive pricing, pleasant, considerate and cooperative personnel and superb organizational skills, I highly recommend Barcon Industries. The obvious pride that Greg takes in his workmanship and Barcon's service to their clients is reflected in the finished product.

Please feel free to contact me to discuss this recommendation further on (3) 5996 2555.

Yours faithfully

Sara McCunnie
